

you are our  
tomorrow.

## **DEMCON IS ALL ABOUT ENGINEERING!**

We make technologically complex systems and products. Whether we are delivering medical solutions or providing challenging high-tech innovations: Demcon contributes to a better world. Using our expertise in aerospace, high-tech systems and life sciences & health. We start with a blank sheet to build the system concepts starting at the core of the problem and end with a prototype that exceeds our clients' expectations. Whatever your role at Demcon is: you will make an impact.
